1. The Member undertakes to treat all information received as strictly confidential. The term "Information" shall be interpreted broadly and includes any materials, such as papers, written records, notes, documents, and data. Purpose of Use:
The photograph and profile link may be used and published on the iSAQB e. V. website and intranet for the duration of membership or until the signatory withdraws consent.

I consent to the use, reproduction, distribution, display, and public presentation of images depicting me and to the use of my personal data identified above for the purposes described. I grant iSAQB e. V. the rights to use my likeness, including the right to use these images for the stated purposes.

Information on Publishing Personal Data, Photographs, or Videos on the Internet

Under Section 22 of the German Art Copyright Act (Kunsturhebergesetz), the publication of personal data and images, such as photographs or video recordings, on the organization's website requires the consent of the individual concerned. If you agree to such use, you may provide your consent. **Giving consent is voluntary and may be withdrawn at any time without stating a reason.** If you choose not to consent, we expressly confirm that you will not suffer any disadvantage.

Publishing these images and data on the Association's website makes them accessible worldwide, including from countries with no or inadequate data protection standards. iSAQB e. V. therefore cannot control Internet access to or use of this information and cannot guarantee compliance with data protection requirements.

Search engines may be used to locate personal data online and, in some cases, identify individuals shown in images. Combining such information with other data available online may make it possible to create personal profiles and enable additional uses, such as advertising. Because other organizations or individuals may access and store this information worldwide, even if consent is withdrawn and the data and images are removed from our website, their continued use by others or discovery through search-engine archives cannot be ruled out.
